# THE PILGRIMS' WELCOME.

### 'American 'Ambassador's First Speech in London.

London, June 27. Lord Rosebery, as he has himself confessed, once received a timely warning against familiar nations. It was on the eve of an address which he had promised to make at Eton, and the admonition came from his son, who was at school there. It was to the effect that no reference should be made to Waterioo as the battle which had been won on the playing fields of Eton. Possibly there were among the jovial Pilgrims at the luxurious dinner served at Claridge's Hotel last night a few distrustful spirits who dreaded the opening of a new series of familiar quotations on the common stock of Angle-Saxon blood, traditions, language, literature and history; but if there were, they were agreeably disappointed. The new American Ambassador was to make his first speech in audience to listen to it and to applaud it raptsly, and it was a natural inference that he old set the key for his own oratory as a messenger of peace, fraternity and good will. This he did, but it was with a fresh note of individuality, confidence and good sense. The oldtime phrases and commorplaces were not repeated. Rhapsodies on the finer harmonies of Anglo-Saxon accord were not attempted. There was a frank and emphatic declaration that the relations of England and America were never closer than at present, and that there was no ground for apprehension of any estrangement in the future place of the usual plea for the maintenance of peace in the English speaking world there tions were wholly in accord with each other, and consideration required that they should remain Good feeling existed, and why not? The Ptigrims, sithough warned that their occupation was menaced, could not answer this pertinent question except by applauding heartily that it is utterly unnecessary for anybody to be anxious about the relations of America and England

The Ambassador's speech was especially remarkable because he resisted the temptation to England. He had a sympathetic audience, accustomed to hearing the well worn phrases; it was the largest gathering which the Pilgrims have ever mustered: it was fairly representative of everything worthy of consideration in influencing English opinion, and the Prime Minister, after Lord Roberts had proposed the health with his usual subtlety to convey the impression that something closer and more formal than cordial good will between America and England was expedient, if not necessary. The Ambassador might easily have yielded to the infectious influences of an exceptionally cordial reception tive of a friendly nation, which was committed by the traditions of a long century to the policy of avoiding European alliances. 'He did not lose sight for a moment of his diplomatic functions. yet he could hardly have been friendlier or more appreciative of the splendid compliment which he was receiving. His speech, delivered with fine variety of style and sustained dignity nation desirous of remaining at peace with all the world, and especially with England. There were no premature attempts to raise a laugh or to establish a reputation as a humorist; every sentence vibrated with earnestness and sin practical results, apart from means and sentimental motives, was evinced, and a pertinent illustration of the value of co-operation was given in the efforts to preserve the Keats house in Rome from destruction. It was an eloquent speech, delivered with rare distinction of manner and with flashes of earnestness and fervor yet it was diplomatic from beginning to end, and as wholesome an American address as the most mpremising Yankee could wish to hear

The Pfigrims Society has carried out in the est practical way the Ambassador's idea of lishmen and Americans. While other organizations for promoting good feeling between the two countries have been exclusively English or American, this is an international body. Representative men of both countries are closely associated in the management, and when there are public dinners or luncheons Americans and Englishmen are seated alternately, so far as is practicable. The abolition of the top table and the distribution of distinguished guests and members around the room have been democratic measures. Sociability and good fellowship have been promoted by the use of small tables with seats for eight or ten. Englishmen and Americans have been brought together more familiarly than at other dinners and are better Anglo-Saxons in consequence of the evening's experience. Permanent acquaintances are formed at nearly every table, engagements are made for the coming week or fortnight and there are many exchanges of courtesies. Ameritems and Englishmen cheer the speeches with equal warmth and have the same relish for an entertairment less formal and perfunctory than the ordinary public dinner. Barriers are thrown down and sympathies are strengthened. Representative men are surprised to find how much they have in common, and at the close of a delightful evening they are more tolerant in their judgments and heartier in their admiration for a country which is not their own. The chief function of a society like the Pilgrims is to produce a feeling of comradeship in the personal relations of Americans and Englishmen among whom friendship already exists. So well has the work been done in the course of three years that the simners are already known as the least formal and conventional and the most companionable and enjoyable in London. The large gathering last night was fairly brimming over with good feeling.

The London Pilgrims are organized on the basis of cordial co-operation of the two national elements, with control in English hands. The president, three of the five vice-presidents, the hororary secretary and a majority of the executive committee are Englishmen, and two vice-presidents, the honorary treasurer and nine members of the governing committee are Americans. The membership is divided fairly equally between the two countries. Among the members are the Archbishop of Canterbury, Prince Francois Hatzfeldt, the Duke of Newcastle, the Earl of Aberdeen, Lord Charles Beresford, Lord Stramcons, Lord Brassey, Earl Roberts, Lord Grenfell, the Lord Chancellor, Lord Lyvedon, Lord Lamington, Lord Napler of Magdala, Visgount Deerhurst, Lord Fairfax, the Master of Elibank, Mr. Justice Darling, Mr. Justice Kennedy, Mr. Justice Walton, Sir Howard Vincent, Rear Admiral Lambdon, Str Thomas Lipton, Sir Vincent Caillard, Sir Bache Cunard, Sir Christopher Furness, Major General Hutchlisen, Sir Alfred Jones, Sir Henry Rawlinson, Str John Puleston, Sir William Ingram, Sir Thomas Barlow, Sir Henry Irving, Sir Gilbert Parker Sir A. Conan Doyle, Sir Douglas Thought, Archdeacon Sinclair, Sir Frederick Poliock. Mr. Egerton Castle, Mr. Moberly Bell, The society was an experiment when the was organized, and its pioneer members the charged with selfishness in attempting the was it for the purpose of bringing them where into notice and of promoting their was notice and of promoting their was social interests. The prosperity of the society has never been in doubt since Lord Roberts assumed the chairmanship, and some of the most influential Englishmen and the most progressive American residents in London rallied their forces and determined its success. It has continued to flourish and has justified its existence by a series of good works-meetings which have brought Americans and Englishmen together in close intimacy and friendship and created an atmosphere for Anglo-Saxon good will and co-operation. The Ambassador's speech might have been an exordium to its promising career three years ago. It cannot now be considered an epitaph, for the society was never more vigorous or prosperous never had larger resources for influencing pub-

It was not the only unusual sight to be found in the store that day either, for on another floor was a counter labelled: "Mismated shoes, 25 cents a pair, not exchangeable." The shoes were tied together in pairs, shough, strictly speaking, there were no proper pairs among them. The expedition needs considerable more money before starting. I cannot say just how much, is necessary, but I have hopes that some generous persons will come to the front and give us what we need. ## "BIG TIM'S" BOWERY LODGING HOUSE.

### Will Have Swimming Pool and Reading Rooms, "Little Tim" Says.

Following "Big Tim's" statement, before sailing from New-York last week, that he proposed to build in the Bowery the most up to date lodging house in the world, "Little Tim" Sullivan said yes looking for a site, adding: It will be the finest yet, with plenty of good

clean rooms, baths, swimming pool, reading rooms, etc., and will not be operated for profit. We want it merely to pay its own expenses, that's all. If any millionaires with philanthropic intent want to follow our example we can assure them they will not have the enmity of any Bowery lodging house keeper. There will be patrons enough on the hig streat for all that are built.

We are going to show that the men of the Bowery, who from time to time have been classed as bums and tramps, are nothing of the sort, and are as willing and anxious to take advantage of a clean, wholesome and comfortable home as any other men when they can find it.
